

NATIONAL GREY LITERATURE COOPERATION MODEL

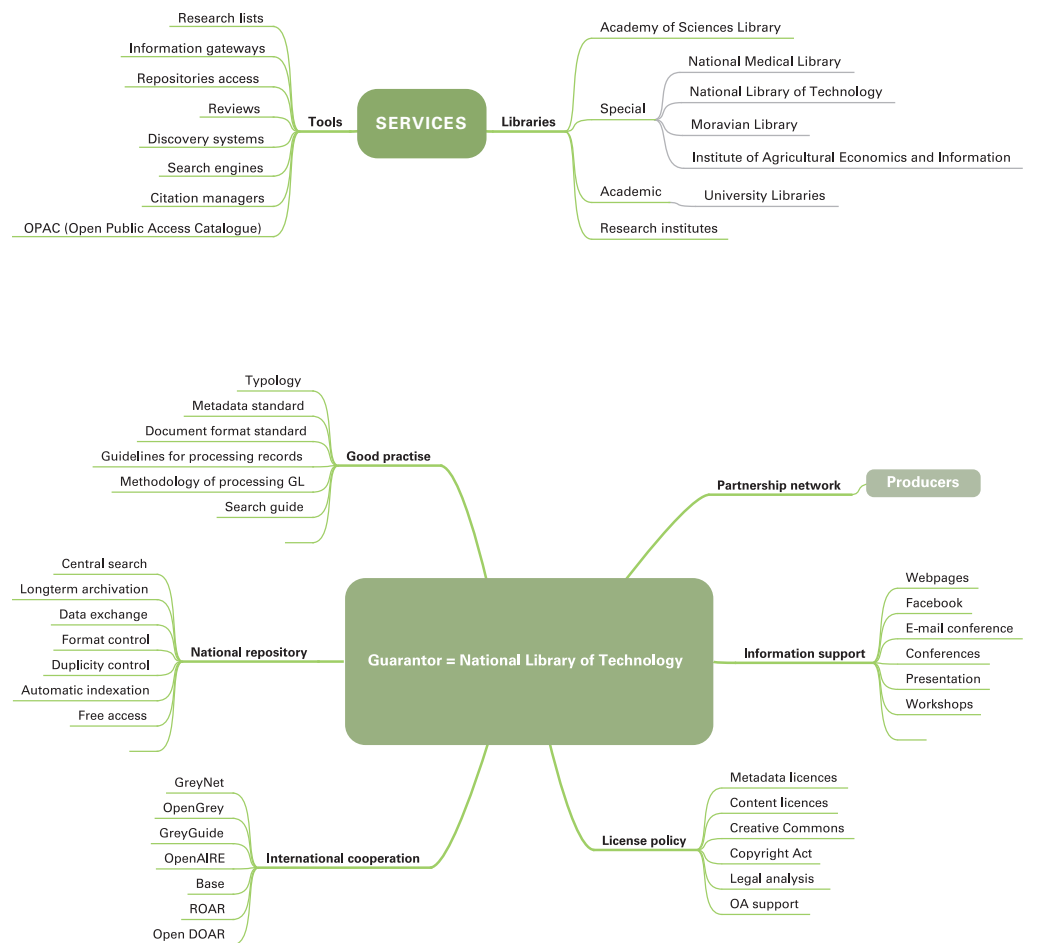

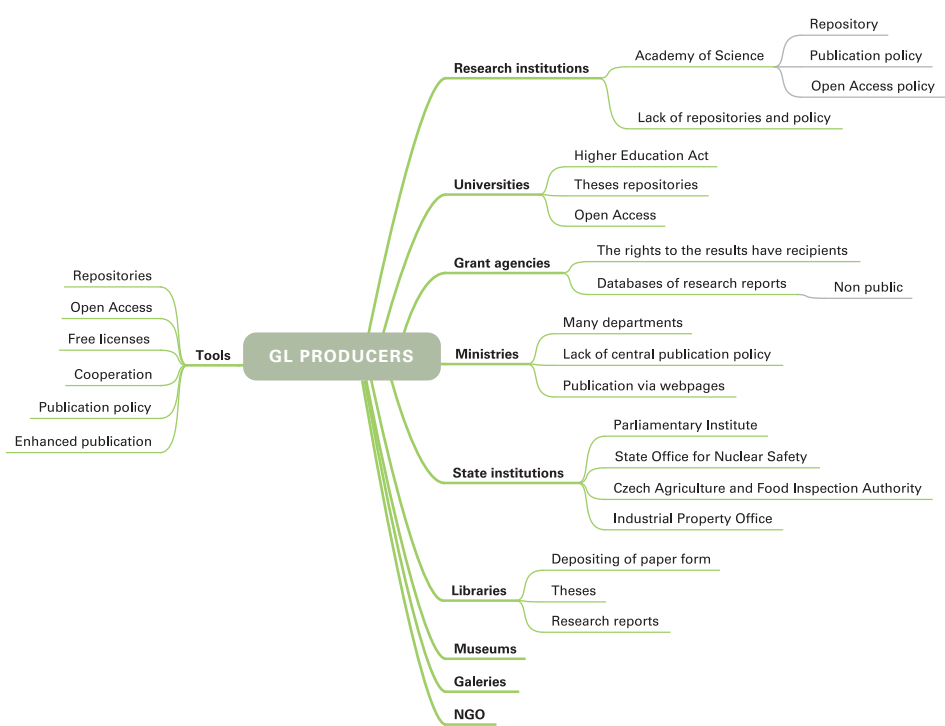

Petra Pejšová & Hana Vyčítalová
National Library of Technology
Czech Republic

Grey literature is an instrument for changes. Electronic form of documents greatly increased possibilities to collect and access grey literature. What discriminated grey literature in traditional paper form – low number of copies, hard to acquire – does not apply to digital born documents. Digital repositories, Open Access, open licenses are tools working for including grey literature into library services.

The role of various institutions in relation with grey literature and the tools they use

GROUPS	1st LEVEL	2nd LEVEL	3rd LEVEL
ROLE	Producers	Guarantors	Services
PARTICIPANTS	Research institutions Universities Grant agencies	National libraries Central libraries Other institutions with central functions	Libraries and information institutions Information brokers
USED TOOLS	Repositories Open Access Free Licenses Cooperation Publication policy Enhanced publications	Good practices / Methodologies Trainings / Standards Information dissemination: • Inf. Webpages • E-mail conferences • Social networking • Presentations • Conferences • Workshops Central repositories (aggregators)	Research lists Reviews Information gateways Discovery systems Search engines Citation managers OPAC (Open Public Access Catalogue) Repositories access

Environment

- National legislation
- EU or international legislation
- National policy for R & D
- Open Access
- Free Licenses
- Technology (HW and SW)

Opportunities

- Open Access
- Visibility
- Unique access
- Reduce costs
- Set standards
- Cooperation

Limitations

- Responsibilities/Roles
- NDA (non-disclosure agreement)
- Copyright
- Communication
- Guarantors
- Managing/Planning
