Survey of Enhanced publications in the Czech Republic

Fifteenth International Conference on Grey Literature

CVTI SR, Bratislava, Slovak Republic, 2-3 December 2013

Petra Pejšová, Hana Vyčítalová
National Technical Library, Czech Republic

- New term
- Uncharted area
- Not regulated in legislation
- Lecture by dr. Farace in 2011 –
*Repurposing Grey Literature – Linking
Research Data to Full-Text Publications*
for full wording see
http://nusi.techlib.cz/images/Farace_text_EN.pdf

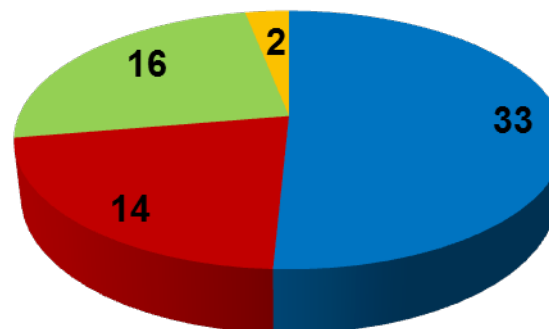

- Aim: to find out situation of enhanced publications at research institutions in the Czech Republic
 - What research data arise?
 - How are they stored and archived?
 - Are they made available?
 - Do the real enhanced publications, i.e. research publications linked directly to research data exist?
 - ...

- Target audience: research institutions (public research institutions, private, other...) – 113
 - Representatives of institutions connected with institution research activities selected
- Form of questioning: structured questionnaire
 - 19 questions, online application
 - 11th September – 7th October 2013
- Contact: email with link to questionnaire to chosen representatives

Institution type	Sciences	Public research institutions	Private research institutions	Other research institutions	In total
Number of addresses	54	21	34	4	113
Number of responses	33	14	16	2	65
Negative answer	2	0	1	1	4

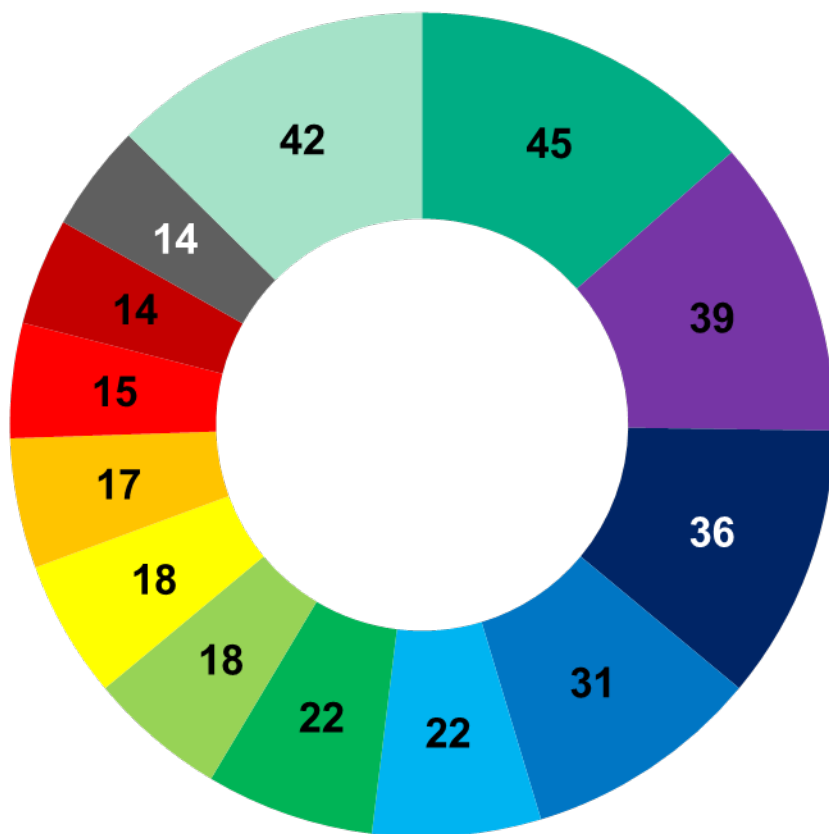

Number of Responses

- Institutes of Academy of Sciences
- Public research institutions
- Private research institutions
- Other research institutions

Do arise following data during your research work?

210 mm

- Research data from measuring
- Accompanying material - visual documentation
- Research data from experiments
- Research data from testing
- Accompanying material - videos
- Research data from surveys
- Accompanying material - models
- Accompanying material - schemes
- Research data from statistical investigation
- Post-published data reviews

Are Data Linked to Research Publications?

210 mm

Yes	38
No	27

- By joint storing of data with publication in digital form on website (15)
- By joint storing of data with publication in digital form in repository (15)
- Information on data availability in records (metadata) on publication (15)
- References from publication to place of data storing in digital form (14)

4

to start linking of data with publications

Are Data Available for Other Research Workers?

210 mm

Yes	44
No	21

- Personal visit at workplace (full-time study, conversation, personal handover of data) (28)
- Data sending by e-mail, through FTP or in another manner (25)
 - On-line on website (15)
 - On-line in digital repository (9)

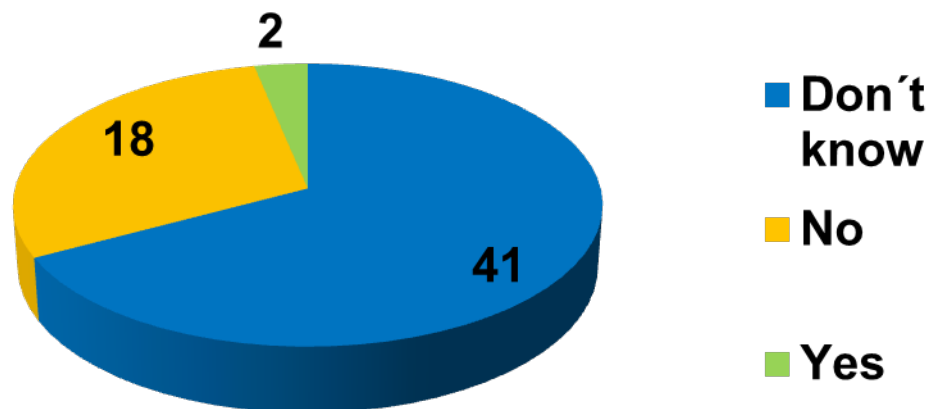

- Risk of data misuse
- Commercial researches – customer's property
- Fear of competition
- Part of intellectual property of research workers, know how of institution
- Subject of patent protection

210 mm

- Are they used?

No	61
Yes	4

- Will they plan to use CC?

- Data volume is difficult to assess – in TB to GB
- Most common formats PDF, DOC and XLS, then many various formats
- 31% for project of common repository – 46% according to situation
