

# From OpenSIGLE to OpenGrey

## Changes and Continuity

Christiane Stock and Nathalie Henrot  
(INIST-CNRS)

# SIGLE

(System for Information on Grey Literature in Europe)

- a European database of bibliographic records in grey literature

Produced by 7-15 European member organizations

1980 → 2005

Content: Multidisciplinary

Hosts: STN International and Silverplatter/Ovid

Specific fields and information in each record:

- English title or keywords
- SIGLE classification code
- Availability statement

# OpenSIGLE – « database repository »

## 700 000 records in open access

The screenshot shows the OpenSIGLE website interface. The header features the 'OpenSIGLE' logo and the subtitle 'SYSTEM FOR INFORMATION ON GREY LITERATURE IN EUROPE'. A navigation bar on the left includes links for 'Home', 'Browse', 'Communities & Collections', 'Titles', 'Authors', 'By Date', 'Other', 'Help', 'About OpenSIGLE', 'Full subject category list', and 'Languages'. The main content area is divided into sections: 'OpenSIGLE' (describing the system and its scope), 'Search' (with a search box and 'Go' button), and 'Communities in OpenSIGLE' (listing 'Countries', 'GreyNet', and 'Subject category list'). The right sidebar contains information about 'GL 10' and 'EAGLE'. Annotations include a box labeled 'SIGLE classification' pointing to the 'Full subject category list' link, and a box labeled 'About, partners, document supply' pointing to the 'About OpenSIGLE' link. A circled area around the 'Search' section is also highlighted.

**OpenSIGLE**  
OpenSIGLE - System for Information on Grey Literature in Europe is your open access to SIGLE bibliographical references of reports and other grey literature (GL) produced in Europe until 2005. Examples of GL include technical or research reports, doctoral dissertations, some conference papers, some official publications, and other types of grey literature. OpenSIGLE covers pure and applied science and technology, economics, other sciences and humanities.

# OPENSIGLE

SYSTEM FOR INFORMATION ON GREY LITERATURE IN EUROPE

## Why change ??

# Winds of change

- Some “deficiencies of the present website”
  - Technical performance at its limits
  - Website layout low key and outdated
  - Absence of features requested by OpenSIGLE users
  
- Re-open OpenSIGLE for new input
  - Add records from 2005 onwards from current partners
  - Open the database to new European partners

### OpenGrey

OpenGrey - **System for Information on Grey Literature in Europe**, formerly OpenSIGLE, is your **open access** to SIGLE **bibliographical references** of reports and other grey literature (GL) produced in Europe.

Examples of GL include **technical or research reports, doctoral dissertations, some conference papers, some official publications**, and other types of grey literature.

OpenGrey covers **pure and applied science and technology, economics, social sciences and humanities**.

### News

### Focus

OpenGrey federates the resources of major European information and document supply centres who joined in an association known as EAGLE: European Association for Grey Literature Exploitation.

Each centre was responsible for collecting grey literature produced in its own country and for providing details of it

OpenGrey now includes the GL conferences preprints from our [GreyNet](#) partner

## ■ Software

- Exalead is the search engine used for the database, with in-house developments using php and MySql software for the user interface

## ■ Persistent identifier

- Each record in OpenSIGLE is identified by a unique identifier, the **handle**.
- These handles will migrate to the new system. A redirection is planned for those identifying communities and collections.

## Trends in management of the goods flow in distribution chains.

**Title :** Trends in management of the goods flow in distribution chains. ; Trendy rizení hmotných toků v distribučních sítích. ;

**Authors :** [Subrt, Pavel](#) ; [Vysoka skola chemicko-technologicka v Praze, Praha \(Czech Republic\)](#) ;

**Publication date :** [2002](#)

**Publisher :** [Praha \(Czech Republic\)](#) ; [Vysoka skola chemicko-technologicka v Praze](#)

**Abstract :** This thesis describes in detail the difficulty in choosing an appropriate distribution strategy, which must respect the trends of modern business and as well as the influence of internationalization, globalization and differentiation of the markets. The change in final customers' purchasing behaviour is another important influence. The factors mentioned above require changes in management systems, changes which include all partners who are involved in the process of meeting customers' expectations and predicting changes in those expectations, business activities included. Because of author's job orientation, the main target of this work is to analyze and compare the theoretical aspects recommended in structuralization of distribution systems; to describe in detail the distribution channels currently in use; to classify the factors and theory influencing the choice of a appropriate distribution strategy; to compare the theoretical approach with practical experience and to propose a distribution strategy for a company oriented towards sales of fast-moving consumer goods with an extensive distribution system. Closely tied to the theoretical chapters are two practical applications: the creation of a new distribution system and the application of a differentiated distribution strategy. The practical part of this dissertation and its conclusions highlight the importance of taking into consideration the variety of distribution channels and the contemporary economic situation. The author has not used real values for financial information as the company, Coty, feels some information to be part of its trade secrets. All financial information linked to Czech and Slovak crowns appearing in the text, charts and tables of this work are adjusted by applying a coefficient recommended by the company. The coefficient is a constant. The use of this constant allows us to follow the logic of the calculations without using the real values.

# Contents, future input and updates

- OpenGrey will include all records from the present OpenSIGLE database
- as well as new records (created since 2005) from partner organizations
- Formal agreements for new input
- Updates through files preferred to harvesting
- Metadata scheme open to additions
- Tools available through the website
- Advisory board for questions arising ?
