GL14 Announcement and Call

Tracking Innovation through Grey Literature Fourteenth International Conference on Grey Literature National Research Council, Rome 29-30 November 2012

Innovation is a process manifested in and through grey literature. Both have their origins in knowledge generation and both demonstrate value for government, academics, business and industry through their uses and applications. In a way, innovation and grey literature are two sides of the same coinage. Innovation is the catalyst for

positive change and grey literature is the measure of benchmarks in the further process of research and development. Innovation and grey literature share parallel life cycles in which early growth is relatively slow until their use and application become recognized both within and later beyond their community of origin. Expected top-line growth and increased bottom-line results are achieved in part through new technologies, through redeployment and enhancement of existing products and services, which at times are unachieved. Nevertheless, the process shared by innovation and grey literature carries on. The goal of the Fourteenth International Conference on Grey Literature seeks to track the process of innovation by tracing the research life cycle and observing its convergence in the field of grey literature. www.textrelease.com

National Technical Library

The **National Technical Library** (hereafter referred to as "NTK") is a central professional library open to public, which offers a unique collection of 250 thousand publications freely accessible in open circulation. Its holdings form the largest collection of Czech and foreign documents from technology and applied natural sciences as well as associated social sciences. It contains a total of 1,2 Mil. volumes of books, journals and newspapers, theses, reports, standards, and trade literature in both printed and electronic forms. Besides its own collection, parts of Central Library of the CTU in Prague and Central Library of the ICT holdings are accessible in NTK.

For detailed information on the National Technical Library visit <http://www.techlib.cz/en/>

As corresponds to its statutes, NTK manages – among others – the project of building the **National Repository of Grey Literature**. The project aims at gathering metadata and possibly full texts of grey documents in the fields of education, science and research. The NTK supports an education in the field of grey literature through annual seminars in the Czech Republic.

About GreyNet Newsletter

This serial publication endeavors to keep information professionals abreast of developments in the field of grey literature. The quarterly newsletter gives exposure to GreyNet's information resources and frontline activities with special emphasis on the International Conference Series on Grey Literature. The GreyNet Newsletter is licensed by EBSCO Publishing and can also be accessed via the Library, Information Science & Technology Abstracts (LISTA) full-text database. This serial publication is made possible through the support of GreyNet's Associate Members and Corporate Authors: FLICC-FEDLINK of the Library of Congress (USA), INIST-CNRS (France), New York Academy of Medicine (USA), EBSCO Publishing (USA), the National Technical Library (Czech Republic), and Japan Science and Technology Agency (JST).

Grey Literature is a field in library and Information science that deals with the production, distribution, and access to multiple document types produced on all levels of government, academics, business, and organization in electronic and print formats not controlled by commercial publishing i.e. where publishing is not the primary activity of the producing body.
